-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The Amendment filed on January 9, 2006, has been entered and acknowledged by the Examiner.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 6-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of U.S. Patent No. 6,717,359 to Kimura. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 6 of the present claimed invention is being anticipated by claims 1 of the U.S. Patent No. 6,717,359 to Kimura.

Claim 7 of the present claimed invention is being anticipated by claims 1 and 4 of the U.S. Patent No. 6,717,359 to Kimura.

Claim 8 of the present claimed invention is being anticipated by claim 2 of the U.S. Patent No. 6,717,359 to Kimura.

Claim 9 of the present claimed invention is being anticipated by claim 3 of the U.S. Patent No. 6,717,359 to Kimura.

Claim 10 of the present claimed invention is being anticipated by claims 1 and 4 of the U.S. Patent No. 6,717,359 to Kimura.

Claim 11 of the present claimed invention is being anticipated by claim 2 of the U.S. Patent No. 6,717,359 to Kimura.

Claim 12 of the present claimed invention is being anticipated by claim 3 of the U.S. Patent No. 6,717,359 to Kimura.

Regarding to claim 13, albeit, Kimura does not specifically disclose an operational panel, a connecting portion and a power source switch, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have

Art Unit: 2879

utilize an operation panel, a connecting portion and a power source switch for the portable telephone.

Claim 14 of the present claimed invention is being anticipated by claim 2 of the U.S. Patent No. 6,717,359 to Kimura.

Allowable Subject Matter

4. Claims 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding to claim 15, prior art of record taken alone or in combination fails to teach or suggest forming a wire over the insulating film, wherein the wire is electrically connected to the semiconductor film through the first opening in combination with other claimed features of the present claimed invention.

Regarding to claim 16, prior art of record taken alone or in combination fails to teach or suggest forming a wire over the insulating film, wherein the wire is electrically connected to the semiconductor film through the first opening in combination with other claimed features of the present claimed invention.

Regarding to claim 17, prior art of record taken alone or in combination fails to teach or suggest forming a wire over the insulating film, wherein the wire is electrically

connected to the semiconductor film through the first opening in combination with other claimed features of the present claimed invention.

Regarding to claim 18, prior art of record taken alone or in combination fails to teach or suggest forming a wire over the insulating film, wherein the wire is electrically connected to the semiconductor film through the first opening in combination with other claimed features of the present claimed invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalei Dong whose telephone number is (571)272-2370. The examiner can normally be reached on 8 A.M. to 5 P.M..
